SUMMARY

Junior Software Engineer and recent Computer Science graduate (June 2026) with 3 years of project-based freelance experience while studying. Built 10+ software applications for small businesses, academic theses, and educational domains using Spring Boot, PHP, MySQL/PostgreSQL. Strong backend foundation with hands-on experience in database design, REST API, authentication, RBAC, and shared hosting deployment. Adaptable and stack-agnostic—comfortable with MVC frameworks and confident in learning new tools quickly.

EXPERIENCE

Freelance Software Developer

June 2023 – Present

Self-Employed / Freelance — Philippines

- Built applications across web, desktop, and game for small businesses and diverse clients
- Developed e-commerce platforms, appointment booking systems, POS, and cash flow systems
- Managed end-to-end delivery — from requirements gathering to deployment and client handover
- Worked directly with non-technical clients on scope, design, and delivery timelines

Full Stack Developer Intern

Feb 2026 – April 2026

The Thomas Aquinas Institute of Learning — Imus, Cavite

- Built the backend for a school management system and admin dashboard
- Designed database schema with proper foreign key relationships, indexes, and normalized structure
- Implemented authentication, real-time notifications, server-side pagination, and full CRUD operations
- Documented the full SDLC using Iterative Waterfall model

PROJECTS

Mitolohiya

Feb 2025 – December 2025

- Contributed to the development of a turn-based Filipino mythology card game as part of academic thesis project
- Optimized code for turn-based combat and implemented level unlock/lock, progression, and reward system in Unity
- Integrated game assets, audio, and voice-over pipelines into gameplay
- Improved code readability and maintainability through refactoring and consistent naming/structure conventions

Multi-campus School Cash Flow System

June 2026 – July 2026

- Developed a cash flow system for St. John Fisher School with RBAC across four roles and audit trail logging
- Built the core features such as bank reconciliation, cash flow, sources/payables, and PDF/CSV export
- Deployed on shared hosting with auto-SSL

TECHNICAL SKILLS

Programming and Framework: Java (Spring Boot), PHP, C/C++, C#, JavaScript (Node.js)

Database: MySQL, PostgreSQL, SQLite, Redis, Supabase

Tools and Workflow: Git, GitHub, Postman, Maven, VS Code, JUnit, MVC, Monolith, Unit Testing, Agile/Waterfall

SOFT SKILLS

- Client communication & requirements gathering
- Cross-team collaboration
- Technical documentation
- Problem-solving & performance optimization
- Time management & independent delivery

EDUCATION

Bachelor of Science in Computer Science | STI College Bacoar | Bacoar, Cavite 2022 – 2026

Information and Communications Technology | Unida Christian Colleges | Imus, Cavite 2020 – 2022
